STORY AND PLOT

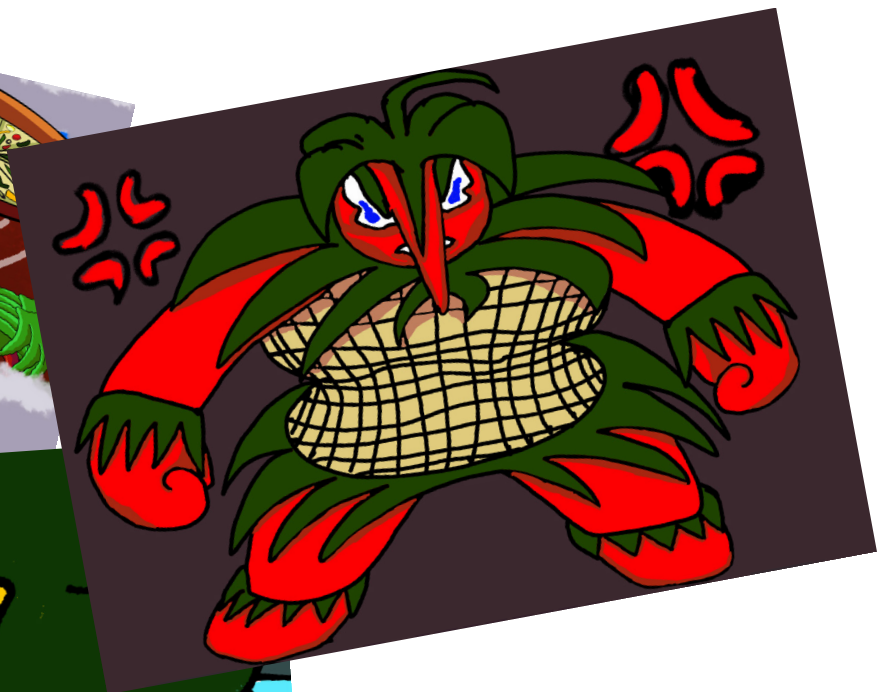

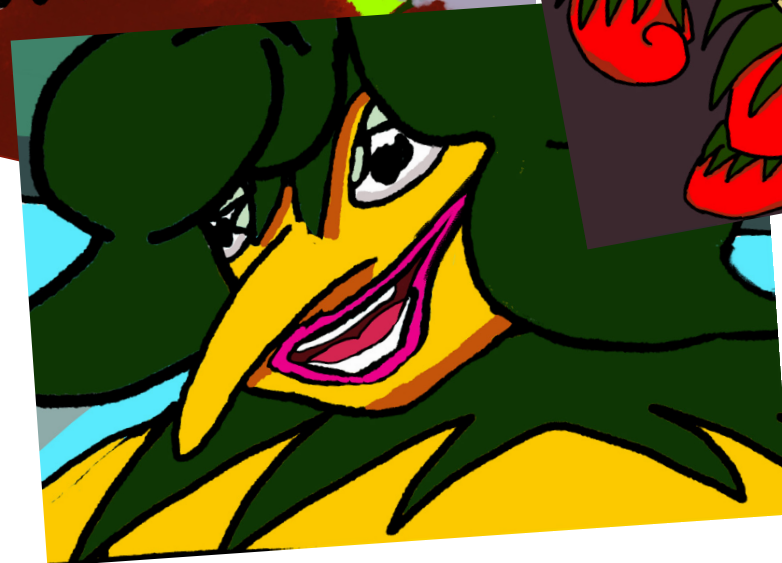

Cover page subject to change.

Based off a Storytelling Project I made in Even Semester of UGBDCDT-L1; Mighty Jalepeanut stars a half peanut and half chilli hybrid of the same name who's on the journey to save his son from the clutches of his evil ex-wife, Carolina and her evil aristocratic boyfriend, President Pinapolean, who also happens to be a genocidal maniac with a hatred towards peanuts.

Dear Jalepeanut,
My beloved ex-husband who has kept me
away from my precious son Jalepeanut
Jr. for so long, how are you? Its unfair
that you keep him with you and never
with me, I know I left him in the forest
at night but that was 10 years ago.
President Pinapolean understands my
love for my son, and has legally altered
the custody permanently in my name. I
will take back what is rightfully my
own.
-Sincerely, Carolina

GAME DESCRIPTION

The game project will be a 2D sidescroller platformer with an emphasis on destruction with a hint of physics based chaos. It is inspired by platformers such as Wario Land 4 and Antonblast.

It is AIMS to be 3 levels long, each with its own dedicated Boss Enemy.

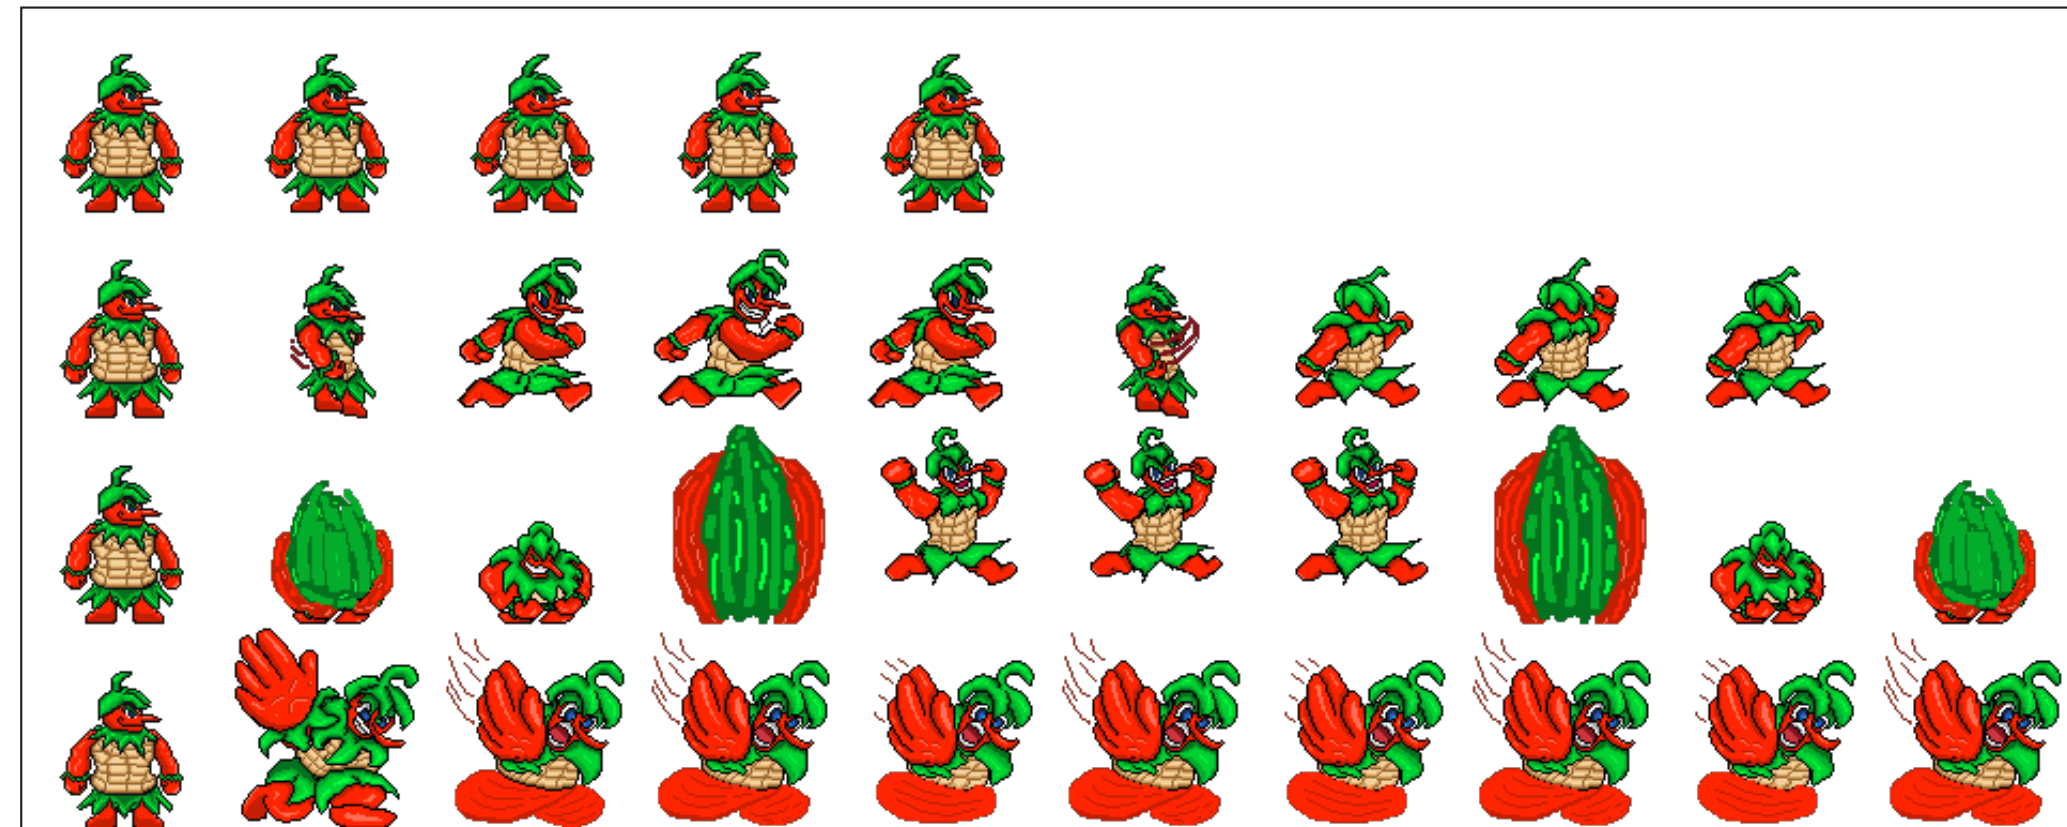

The plot of the game will be broken down across each levels as mentioned below:

- **Level 1: Chilli Conclave.** Follows Jalepeanut storming out of his house to chase his abducted son and the spaceship carrying him. Ends with a bossfight with his step-brother, Clowndiment at a Circus blocking the path.
-
- **Level 2: Downtown Diabetic.** Jalepeanut launches himself to the sky, attempting to reach his son but fails miserably and falls down to the next level. Introduces a checkpoint system through the Grim Reaper, Samortsa Joe. Ends with a bossfight against a local mob boss on Pinapolean's payroll, Boondi Imartinath.
-
- **Level 3: Pineapolis.** Jalepeanut tricks the grim reaper to transport him to the final level. A huge metropolis maze, focusing on switching perspectives to proceed. Ends with a penultimate showdown against President Pinapoleon.
